Dear Conservation Voter,

We welcomed many new faces to Richmond during the 2014 General Assembly session. Along with Virginia's new Governor, Lieutenant Governor and Attorney General, sixteen new Delegates walked the halls of the Capitol and two new Senators joined the upper chamber this year. Virginia had a cascade of special elections that moved legislators from one seat to another after the results of nail-biting recounts were finalized. And once the dust settled, a rare mid-session restructuring of committee assignments shifted control of the Senate to Democrats with new Lieutenant Governor Ralph Northam casting tie-breaking votes.

We began the session with a conservation commitment from Governor-elect Terry McAuliffe to veto any legislation that would lift Virginia's 31-year ban on uranium mining or even hint at developing regulations for such a dangerous activity. This is a hard-earned victory for citizens, businesses, and organizations statewide that understand the long term economic risk to Virginians is not worth the short term financial gains for a few private citizens. We applaud Governor McAuliffe for reaffirming his commitment to keeping the ban and to the tens of thousands of Virginians who helped make this victory possible.

Medicaid expansion and its implications on Virginia's budget consumed a significant part of the session, the special session and the veto session. As of this writing, the debate continues and is still tied to ongoing budget negotiations. As a result, funding levels for key land conservation programs remain uncertain.

Despite the contentious debate over Medicaid expansion and the partisan power change in the Senate, conservation issues received strong bipartisan attention on several fronts. Bills encouraging the use of clean energy, improvements to the Commonwealth's Renewable Portfolio Standard, the repeal of the tax on hybrid-electric vehicles, and increases in transparency to Virginia's transportation processes were all well-received and passed with bipartisan support. This bipartisan cooperation continues to demonstrate that protecting our clean air, clean water and open spaces is not a partisan issue, but rather important policy we all can support.

While we did see significant bipartisan support on many proposals, our natural landscape unfortunately suffered defeat on a few very important policies. We were unable to maintain local land use authority for counties and towns to best manage local agricultural operations.

Additionally, along with our partners, we were unable to secure common sense protections for ground and surface waters against the many uncertainties of modern hydraulic fracking in the Tidewater Region of the Commonwealth. We continue our efforts to educate elected officials on the unintended consequences to our natural landscape when appropriate safeguards are not maintained.

Throughout the rest of the year, we will keep a watchful eye on these issues, and others, so that we can continue to advocate for future policy improvements that benefit our natural landscape. Thank you for following the 2014 General Assembly session with us and for your continued support of conservation. The work of the Virginia League is only made possible because of you. Your involvement is vital to the success of our efforts as we protect the Commonwealth's precious and natural landscape.

Emily Francis
Interim Executive Director
Virginia League of Conservation Voters

The Political Force for Conservation

The Virginia League of Conservation Voters protects resources important to all Virginians: clean air and water, thriving communities and rural landscapes, productive farms and forests, historic battlefields and Main Streets, and ample public lands and recreation.

To do this, we secure good public policies at the state level, hold elected officials accountable for their positions on conservation and endorse conservation-minded candidates for state level offices. We are unique among Virginia's conservation community in that we are the political force for conservation at the State Capitol.

Conservation Accountability

Our annual Conservation Scorecard is the only tool available to Virginians that demonstrates how our elected officials perform on behalf of our environment. Knowing what happens in committee rooms and on the floor of both the House and Senate chambers is critical information. We honor the best conservation legislators for their hard work during the General Assembly and we shine a public spotlight on the remaining legislators who didn't quite do enough. It is critical that you talk with your elected officials about their scores included in this Conservation Scorecard. Let them know our environment is worth preserving.

Conservation Endorsements

The Virginia League is one of the few organizations in the state that endorses and seeks to elect candidates to office. Along with the scores in our Conservation Scorecard, we conduct research, administer candidate questionnaires and perform personal interviews to determine which candidates deserve our "conservation seal of approval."

After being endorsed by our Board of Directors, candidates are provided with political field expertise and financial backing. We educate conservation voters about the best candidates and work hard to ensure our endorsed candidates win.

Conservation Advocacy

Once elections are final, Virginia League staff and volunteers increase their advocacy activities on behalf of Virginia's natural landscape. We work to inform elected officials about the value and benefits of conservation and to push forward sound conservation policy.

There are two ways you can get involved in our advocacy efforts:

1) Conservation Action Teams

Our environment is better protected when residents all across the Commonwealth speak in favor of clean air, clean water and open spaces.

To actively engage residents in the protection of these important natural resources, the Virginia Conservation Network and the Virginia League of Conservation Voters Education Fund created the Conservation Action Team Program (formerly known as Legislative Contact Teams) in the fall of 2002.

Action Teams are designed to recruit and train volunteers to serve as conservation leaders in their local community. Program participants learn about important conservation topics, engage in activities that build support for our environment, and speak directly to their legislators about preserving our natural landscape. The more our elected officials hear from conservationists in their districts, the better our environment.

To date, the Action Team Program has trained thousands of volunteers to communicate effectively with elected leaders. Over 400 participants, in nearly every House and Senate district, have been involved in advocacy efforts related to the 2014 General Assembly Session. Thanks to those outspoken individuals all across Virginia, our conservation voice at the Capitol is stronger than ever.

To join your local Action Team or for more information, visit valcvvf.org.

2) Conservation E-Action

Action alerts from the Virginia League are a simple way to stay updated on what our decision makers are doing (or not doing) on behalf of conservation. At critical moments during the General Assembly session and throughout the year, we ask volunteers to take action. Those actions include sending emails, making phone calls and writing letters to the editor of your local newspaper; collectively they send a strong message to our elected officials that conservation is a priority.

Please sign up for Conservation E-Action Alerts by visiting www.valcv.org. We will put you in touch with key decision makers on issues such as clean air and water, transportation, energy, land conservation and others.

Keep an eye on valcv.org to read about our events and activities throughout the rest of the year. During the legislative session, you can always find our Conservation Bill Chart which lists important conservation bills moving through the General Assembly.

2014 Legislative Heroes

Our Legislative Heroes show special dedication to conservation priorities. Four Senators and nineteen Delegates voted on behalf of conservation on every bill the Virginia League selected for the 2014 Conservation Scorecard. These legislators deserve a special show of support for their hard work, integrity and dedication to environmental concerns – especially when it is the toughest vote.

Session Highlights and Scorecard Vote Key

A significant highlight from the 2014 General Assembly session was the widespread bipartisan support for a range of conservation policies. Members from both sides of the aisle introduced and supported strong conservation legislation that advanced clean energy, improved our transportation system, protected vital water quality, and promoted good government.

Bipartisan efforts were particularly strong with respect to renewable energy. You'll notice on our patron credits page that multiple bills were introduced to encourage the use of renewables – specifically solar. Legislation (SB 222, Petersen D-Fairfax) was passed almost unanimously to remove restrictions by Homeowner Associations on the use of solar panels. Other legislation (SB 653, Norment R-Williamsburg) included the creation of a grant fund to assist with the costs of installing renewable energy sources. This bipartisan cooperation on such an important issue is promising for future progress.

It is worth noting that the work of a conservation watchdog is never finished. Even the simplest of conservation bills can be quietly amended to include language that drastically alters its original intent. We are reminded that the work of the Virginia League to remain ever watchful and to quickly alert elected officials to changes that occur in the blink of an eye is a critical service for conservationists statewide.

While these changes did not occur swiftly, the Virginia League was particularly watchful of this year's leading transportation legislation (HB 2, Stolle R-Virginia Beach). The bill prioritized the funds from last year's landmark transportation package and while we did not take an official position on the bill – which is why you will not find it listed in the Scorecard – we were able to advocate for and secure important improvements. Those improvements included taking environmental impacts into account when rating transportation projects and increasing transparency in how transportation projects are funded.

As you continue reading the Virginia League's 2014 Conservation Scorecard, you will not see every bill that our staff worked on. You will, however, see the measures that illustrate a clear distinction between those legislators who supported conservation positions and those who did not.

We invite you now to review the Vote Key on the following pages to learn more about the votes we have selected and to find out how your Delegate and Senator scored on this year's important conservation topics.

Protecting Our Water

✘ HB 1173 – Stormwater Management Programs

Delegate Keith Hodges (R-Urbanna)

Stormwater was a prominent issue in the General Assembly this year. House Bill 1173 was one of many bills aimed at delaying or weakening the implementation of localities' stormwater management plans. These plans, set to take effect July 1, will reduce the amount of pollution running off our developed lands and entering local streams and the Chesapeake Bay. Stormwater is a source of pollution that is on the rise in Virginia; efforts must be redoubled, not weakened, to reduce this polluted runoff. The Virginia League opposed any legislation that delayed or weakened stormwater pollution reductions.

We opposed HB 1173 as it came before the House Committee on Agriculture, Chesapeake and Natural Resources due to the fact that it weakened pollution reductions for construction projects; the bill reported from Committee by a wide margin. It was later amended after extended negotiations between stakeholders, allowing the Virginia League to remove opposition as the bill moved to the House Floor and over to the Senate. The Governor approved the bill. (*House Committee: 17-Y 4-N*)

✔ SB 48 – Drilling in the Eastern Virginia Groundwater Management Area

Senator Richard Stuart (R-Montross)

Over the past two years, Texas-based Shore Exploration and Production Company has purchased more than 84,000 acres of leases in what is known as the Taylorsville Basin, a geologic formation east of Fredericksburg. Representing a portion of this area, Senator Stuart introduced initial legislation to ban oil and gas drilling in this region (defined as the Eastern Virginia Groundwater Management Area).

After working with stakeholders, Senator Stuart offered substitute language that would enhance surface and groundwater protections if oil and gas drilling were to commence in the region. The substitute bill, which the Virginia League supported, called for a few simple improvements to current policy: 1) environmental impact assessments for each project must include impacts to surface and groundwater quality and quantity 2) ambient ground and drinking water must be sampled prior to drilling, and 3) the Department of Mines, Minerals and Energy must incorporate into its permits water quality recommendations from the Department of Environmental Quality.

This modest bill passed the Senate Agriculture Committee unanimously and passed the floor of the Senate with broad bipartisan

support. Unfortunately, it was tabled by a voice vote in the House Committee on Commerce and Labor. (*Senate: 28-Y 12-N*)

✘ SB 551 – Virginia Scenic Rivers System; amendment

Senator Phillip Puckett (D-Tazewell)

Virginia's Scenic Rivers System serves to preserve the scenic, recreational and historic values that so many of our rivers and streams hold. As introduced, SB 551 intended to designate a portion of the Cranesnest River in Dickenson County as a component of the Scenic Rivers System – which the Virginia League supported. However, the House of Delegates quietly amended the bill to limit the use of all river designations so they may not prohibit mining or surface mineral mining on the lands adjacent to designated rivers and streams. This amendment undermines the intent and purpose of the overall Scenic Rivers program. The Senate approved the amendment – which is the vote scored – and the bill was sent to the Governor for approval. Prior to the Veto Session, Governor McAuliffe made amendments addressing our concern. The Senate concurred with the Governor's amendments through a bipartisan vote while the House rejected the amendments. (*Senate: 21-Y 17-N*)

✓ SB 629 – Navigation On Certain Waters

Senator David Marsden (D-Burke)

The Commonwealth's unique landscape yields great opportunity for Virginians to enjoy an array of outdoor activities. While canoeing and kayaking have become two of the most popular of these activities, our current laws make persons floating upon certain waters liable for trespass. Senate Bill 629 would have removed this liability to ensure that all Virginians have the right to access the Commonwealth's streams and rivers. The bill received bipartisan support in the Senate Committee on Agriculture, Conservation and Natural Resources, which was critical for the bill to move to the Senate Floor, where it ultimately suffered defeat. *(Senate Committee: 7-Y 6-N)*

Land Use and Transportation

✗ HB 268 – Limitations to Local Land Use Authority

Delegate Bobby Orrock (R-Thornburg)

The Commonwealth's economy is largely dependent on its rich, diverse agricultural operations. With each region of Virginia having unique specialties, local governments have had the ability to work with farmers and residents to ensure protections of the health, safety and livelihood of their communities. However, in the

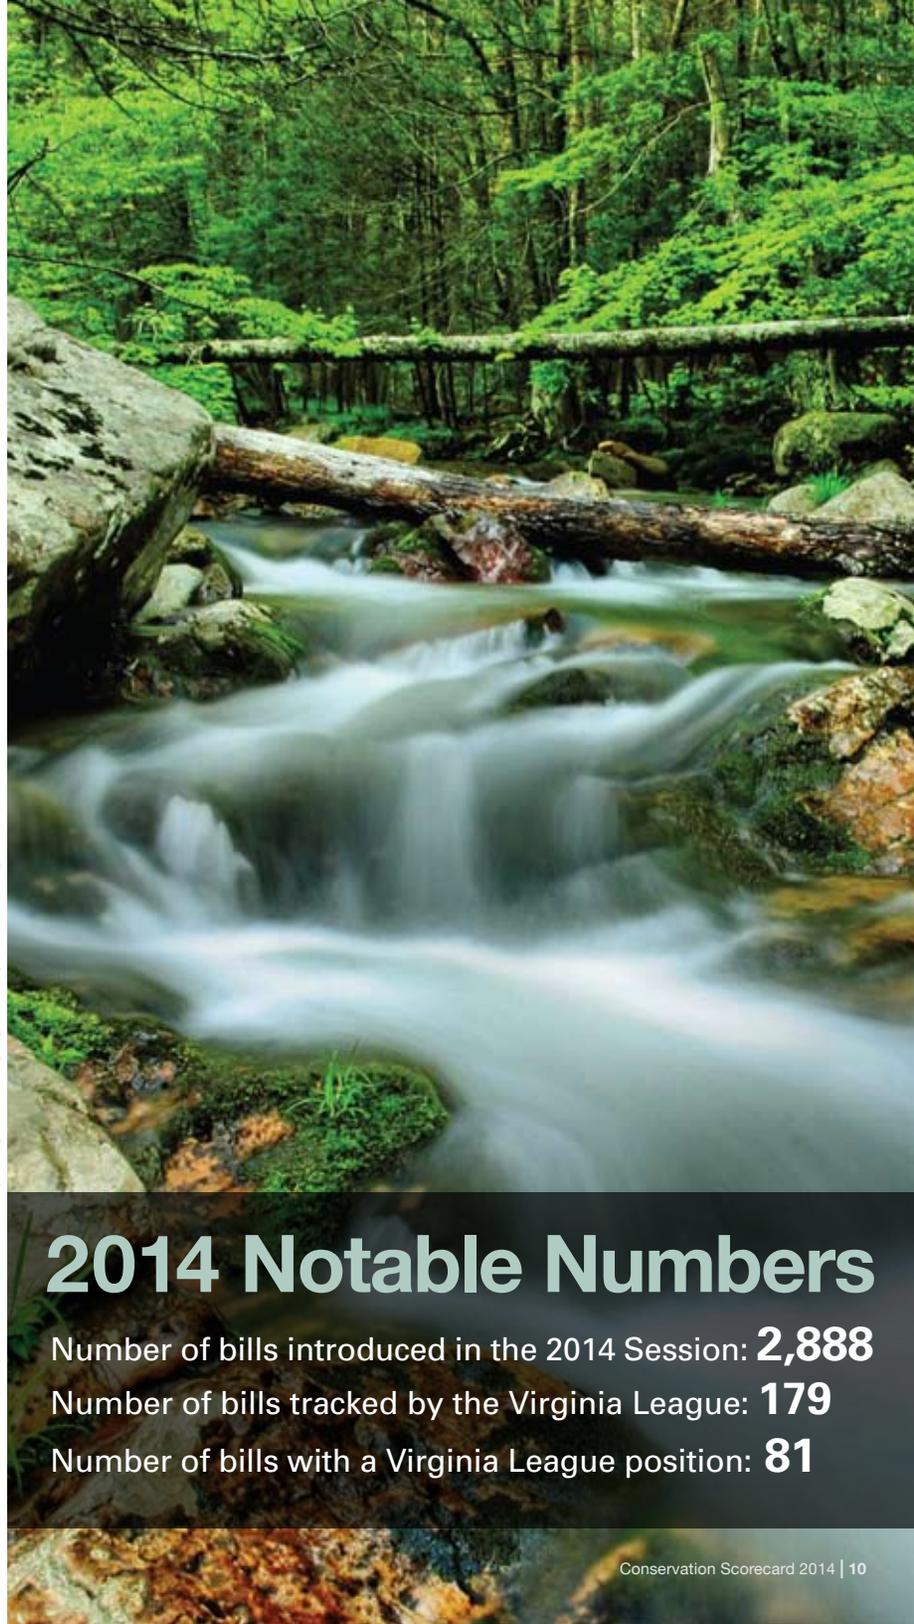

second consecutive year of assault on this authority, House Bill 268 and its companion Senate Bill 51 (Stuart, R-Montross) remove a locality's ability to work with agricultural operations and instead place a problematic one-size-fits-all regulation on every locality. Despite strong opposition from the conservation community and local governments, this bill passed both the House and the Senate. The Governor approved the bill. *(Senate: 33-Y 7-N; House: 73-Y 23-N)*

✗ HB 377 – Billboard Relocation

Delegate Richard Anderson (R-Woodbridge)

During last year's General Assembly, legislators approved a bill that allows billboards to be relocated as a result of certain road projects. That relocation is allowed even if a locality's local ordinance prohibits a billboard in that location. This year, House Bill 377 and its companion Senate Bill 295 (Puckett, D-Tazewell) expand the list of reasons for billboard relocation to include the erection of a sound barrier. This legislation disregards the protections localities have in place to preserve their natural and scenic landscape. This bill passed both the House and the Senate – which is the vote scored – and was sent to the Governor for approval. The Governor made amendments requiring local officials to approve the relocation; however, this amendment was rejected by the House. *(Senate: 28-Y 12-N; House: 62-Y 37-N)*

2014 Notable Numbers

Number of bills introduced in the 2014 Session: **2,888**

Number of bills tracked by the Virginia League: **179**

Number of bills with a Virginia League position: **81**

✓ **HB 975 and SB 127 – Repeal of Hybrid Electric Motor Vehicles Annual License Tax**

Delegate Tom Rust (R-Herndon)
Senator Stephen Newman (R-Forest)

The 2013 General Assembly passed landmark transportation legislation that included a \$64 annual licensing tax directed at hybrid-electric vehicles. This tax was viewed by many Virginians to be an unfair tax applying only to those who were trying to lessen their carbon footprint. After the introduction of many bills to repeal this tax, House Bill 975 and Senate Bill 127 became the vehicles to move this legislation through the General Assembly. This quickly became a strong bipartisan issue and the bills passed overwhelmingly. The Governor approved both of these bills. (*Senate: 35-Y 3-N; House: 89-Y 9-N*)

Energy

✓ **HB 1239 and SB 418 – Solar Equipment Tax Exemption**

Delegate Tim Hugo (R-Centreville)
Senator Emmett Hanger (R-Mount Solon)

Tax incentives are an effective approach to encouraging the use of renewable energy in the Commonwealth. The 2014 session heard and passed with broad bipartisan support legislation incentivizing the use of solar energy. House Bill 1239 and Senate Bill 418 exempt businesses of real and personal property tax on solar energy equipment, facilities, and devices

that collect, generate, transfer and store thermal or electric energy. The Governor approved both of these bills. (*Senate: 40-Y 0-N; House: 93-Y 6-N*)

✓ **SB 498 – Renewable Portfolio Standard**
Senator Donald McEachin (D-Richmond)

The conservation community seeks to improve Virginia’s voluntary Renewable Portfolio Standard (RPS) year after year. This session, we were able to make a small, yet significant improvement to the program. Senate Bill 498 and its companion House Bill 822 (Lopez, D-Arlington) limit the time a utility has to use its renewable energy certificates towards its RPS goals to five years. Previously, utilities had no time limit and could apply renewable energy created decades ago to their RPS goals. This bill received broad bipartisan support in both the Senate and the House. The Governor approved the bill. (*Senate: 40-Y 0-N; House: 88-Y 9-N*)

Good Government

✓ **SB 3 – No-excuse Absentee Voting**
Senator Janet Howell (D-Reston)

In Virginia, every year is an election year. A key component of a vibrant democratic process is for citizens to be able to have their voices heard. To do this, voting should be more accessible for Virginians. No-excuse absentee voting, as proposed

in Senate Bill 3, would have allowed qualified voters to vote in person prior to the election regardless of the reason. This legislation would have provided more opportunities for voters to take part in the democratic process. By a party line vote, the bill failed to report from the Senate Committee on Privileges and Elections. (*Senate Committee: 7-Y 7-N*)

✓ **SB 158 – Bipartisan Virginia Redistricting Commission**

Senator John Miller (D-Newport News)

In 2013, every seat in the House of Delegates was up for re-election. Almost half of those seats, however, went uncontested and were considered to be safe before Election Day. This created a shortfall of choice for many Virginians. Part of the blame is attributed to the fact that legislators seemingly choose their voters every 10 years when they re-draw state district lines. This creates districts that are virtually impossible for challengers to overcome the incumbents. However, year after year, the General Assembly defeats legislation to create a bipartisan redistricting commission. This year, Senate Bill 158 would have created a referendum to put the issue before voters this fall. This bill received broad bipartisan support in the Senate, but was quickly tabled by a voice vote in the House Elections Subcommittee. (*Senate: 36-Y 4-N*)

Know the Score

As a conservation watchdog in the General Assembly, the Virginia League tracks voting records on key conservation and funding legislation. We work hard to make sure legislators hear from their constituents. Then at session's end, we publish this Conservation Scorecard to help voters distinguish between the rhetoric and the reality of a lawmaker's record.

Check out your legislators' scores and let them know what you think. Thank them for supporting conservation or let them know they can do better. Send an email, make a phone call or schedule a visit with your legislator—it doesn't matter how you contact them, just let them know you saw their scores. Visit valcv.org to find your legislators' contact information.

How the Votes Were Chosen

Hundreds of bills that impact our environment are introduced in the legislature

each year. Throughout the annual session, we provide clear guidance to legislators on the conservation community's preferred position on bills. We also alert legislators to the fact that these bills may be included in the Conservation Scorecard.

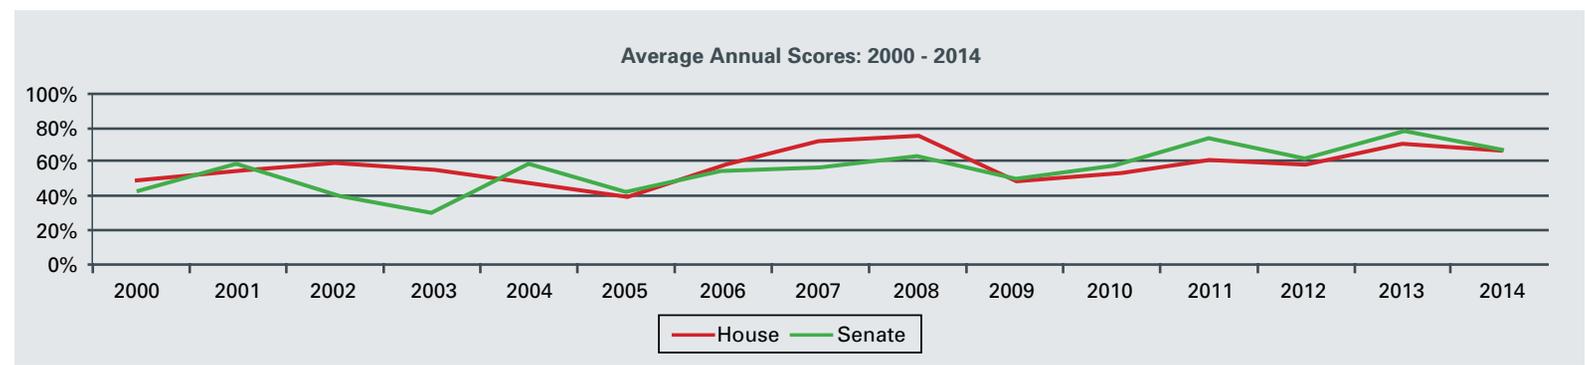

Once the session has concluded, the Virginia League chooses a handful of important votes that illustrate a clear distinction between those legislators who supported the conservation position and those who did not. Some of these important votes are held in committee while others are held on the full floor of the House and/or Senate.

How the Scores Were Calculated

For each correct conservation vote taken by a legislator, he or she receives one point. If this legislator was also the patron of a conservation bill, he or she receives a patron credit in the form of one extra

point. These cumulative points are divided by the total number of conservation voting opportunities available for that particular legislator. This percentage is the final score reported in the Conservation Scorecard.

It is important to remember that we must not permanently chastise legislators for one year's poor performance. Every legislator has room for improvement and we should be encouraging them each session to better protect our environment. Conversely, we must not take legislators' good performances for granted—they still need to hear from conservation voters.

The Importance of Bill Patrons

The Virginia League acknowledges the efforts of those legislators who promoted conservation and good government in their 2014 introduced legislation. These patrons received an additional “plus” vote on the Scorecard. Note that only one Patron “extra” credit is allocated per legislator.

Clean Water

Delegate Scott Lingamfelter (R) – HB 131; Chesapeake Bay Voluntary Tax Contributions

Delegate Ed Scott (R) – HB 655; Menhaden fishery management

Delegate Les Adams (R) – HB 1116; Scenic River Designation

Senator Richard Stuart (R) – SB 48; Water quality protections

Senator Richard Stuart (R) – SB 49; Menhaden fishery management

Senator Creigh Deeds (D) – SB 257; Scenic River Designation

Senator Emmett Hanger (R) – SB 414; Chesapeake Bay Voluntary Tax Contributions

Senator Phillip Puckett (D) – SB 551; Scenic River Designation

Senator David Marsden (D) – SB 629; Navigation on certain waters

Transportation

Delegate Scott Surovell (D) – HB 4; Hybrid tax repeal

Delegate Kaye Kory (D) – HB 47; Hybrid tax repeal

Delegate Randy Minchew (R) – HB 416; Preservation of Loudoun unpaved roads

Delegate Tim Hugo (R) – HB 904; Transportation projects notice by VDOT

Delegate Tom Rust (R) – HB 975; Hybrid tax repeal

Delegate Ron Villanueva (R) – HB 1090; Transportation technology programs update

Senator Adam Ebbin (D) – SB 1; Hybrid tax repeal

Senator Kenny Alexander (D) – SB 26; Public comment on transportation projects

Senator Stephen Newman (R) – SB 127; Hybrid tax repeal

Senator Richard Stuart (R) – SB 147; VDOT public notice on projects

Senator Jill Vogel (R) – SB 397; Preservation of Loudoun unpaved roads

Energy

Delegate Luke Torian (D) – HB 687; Building Revitalization Grant Fund

Delegate Alfonso Lopez (D) – HB 822; Renewable Portfolio Standard reform

Delegate Joseph Yost (R) – HB 879; Net metering

Delegate Ron Villanueva (R) – HB 910; Renewable energy tax credits

Delegate Rob Krupicka (D) – HB 906; Net metering

Delegate Ron Villanueva (R) – HB 1063; Renewable energy tax credits

Delegate Tim Hugo (R) – HB 1239; Tax exemption on solar equipment

Delegate Chris Stolle (R) – HJ 16; Recurrent flooding study

Senator William Stanley (R) – SB 106; Building Revitalization Grant Fund

Senator Chap Petersen (D) – SB 222; Solar panels in community associations

Senator John Edwards (D) – SB 350; Net metering

Senator Donald McEachin (D) – SB 498; Renewable Portfolio Standard reform

Senator Frank Wagner (R) – SB 512; Tax exemption on solar equipment

Senator Tommy Norment (R) – SB 653; Renewable energy grants

Senator Mamie Locke (D) – SJ 3; Recurrent flooding study

Senator Jeffrey McWaters (R) – SJ 34; Recurrent flooding study

Land Use

Senator Emmett Hanger (R) – SJ 63; Bobwhite quail preservation study

Good Government

Delegate Kaye Kory (D) – HB 37; Absentee voting persons 65 and older

Delegate Marcus Simon (D) – HB 75; No-excuse absentee voting

Delegate Rosalyn Dance (D) – HB 119; No-excuse absentee voting

Delegate Charniele Herring (D) – HB 601; No-excuse absentee voting

Delegate Monty Mason (D) – HB 622; No-excuse absentee voting

Delegate Luke Torian (D) – HB 692; No-excuse absentee voting

Delegate Michael Futrell (D) – HB 783; No-excuse absentee voting

Delegate Alfonso Lopez (D) – HB 800; No-excuse absentee voting

Delegate Alfonso Lopez (D) – HB 802; Absentee voting persons 65 and older

Senator Janet Howell (D) – SB 3; No-excuse absentee voting

Senator John Miller (D) – SB 16; Absentee voting persons 65 and older

Senator Barbara Favola (D) – SB 129; Absentee voting persons 65 and older

Senator George Barker (D) – SB 140; Absentee voting persons 65 and older

Senator John Miller (D) – SB 158; Bipartisan Redistricting Commission referendum

Senator Jeffrey McWaters (R) – SB 182; Absentee voting persons 65 and older

Senator Creigh Deeds (D) – SJ 37; Virginia Redistricting Commission

VIRGINIA LEAGUE OF CONSERVATION VOTERS

The Virginia League of Conservation Voters protects resources important to all Virginians: clean air and water, thriving communities and rural landscapes, productive farms and forests, historic battlefields and Main Streets, and ample public lands and recreation. We secure good public policy at the Capitol, hold Virginia's elected officials accountable for their positions on conservation and work to elect pro-conservation candidates to office.

The Virginia League is a nonpartisan, nonprofit advocacy organization and gifts to it and its Political Action Committee are not tax deductible.
